

# FENIX SRA™ 1LC

## The One That Works

### Product Description

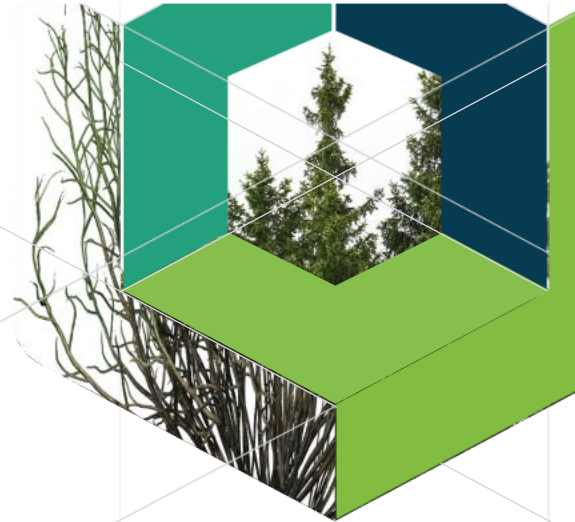

FENIX SRA™ 1LC is a liquid soil remediation agent based on buffered amine oxide (BAO) technology, designed for penetration in organically hydrophobic soils. Utilized to remediate depleted soils after a significant fire event.

### Benefits and Features

- Bio-renewable (note derived from petrochemicals)
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability
- Components “generally recognized as safe” by USFDA and have low inherent toxicology

### Application Rate

1 pint to 2 quarts per acre
