

INAPRO[®] HS-MSO

The One That Works

Product Description

INAPRO[®] HS-MSO is a buffered amine oxide surfactant blend with methylated seed oil to increase spread and penetration. Replacing crop oil concentrates required by active labels.

Benefits and Features

- Two-in-one formulation containing both the properties of buffered amine oxides and methylated seed oils
- The two-in-one formulation provides both industry defining spreading and penetrating capabilities that make it unique
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability
- Outperforms retention and penetration of commodity adjuvants
- Patent pending

Application Rate

0.375%-0.750% v/v -or- 3 pt. to 6 pt. per 100 gallons
