

## INAPRO® IVM

• Activator • Penetrant • Surface-Active Agent • Buffering Agent • Spreader

KEEP OUT OF REACH OF CHILDREN

### DANGER!

Causes severe skin burns and eye damage  
Causes serious eye damage

#### Principal Functioning Agents:

Coco dimethylamine oxide, citric acid, trisodium citrate, dihydrate..... 27.42%  
Constituents Ineffective as Spray Adjuvants..... 72.58%  
Total..... 100.00%  
(Surfactant Content 18.75%)  
Ingredients exempt from the requirements of a tolerance under 40 CFR 180.

See Safety Data Sheet (SDS) for more information.

NOT FOR AQUATIC USE

**GENERAL INFORMATION:** For In-Can Use. Intended for IVM use.

INAPRO® IVM increases the performance of certain herbicides. The product contains a surface-active agent and small amounts of mineral based pH buffers that facilitate constant pH of the ready-to-use solution in the spray tank and when applied to the foliage.

Intended for IVM and turf use. May be used on agricultural, forestry, industrial, structural and cropland sites against nuisance plants.

**DIRECTIONS FOR USE:** When used as a buffer in a tank mix, first add INAPRO® IVM, mix, and proceed with the pesticide instruction label. INAPRO® IVM can be added at any time when used as a surface-active agent, penetrant, activator, and/or a spreader.

**APPLICATION RATE:** Use INAPRO® IVM at a rate of 0.203-2% v/v or 26-256 liquid ounces per 100 gallons of total tank blend herbicide solution unless an alternative recommendation is noted on the pesticide label. Use rate is dependent on weed species, herbicide, conditions, and standard industry practices.

**MIXING:** To reduce foaming, add the full quantity of the INAPRO® IVM when spray tank is nearly full. Mix thoroughly.

**COMPATIBILITY:** INAPRO® IVM is compatible with technical grade Glyphosate and Glyphosate containing formulations, 2,4-Dichlorophenoxyacetic acid and 2,4-Dichlorophenoxyacetic acid salts, brushweed herbicides, and other herbicides containing metsulfuron-methyl, picloram and/or triclopyr. However, if the desired combination has not been previously used, a compatibility test is recommended.

Always consult herbicide product labels for proper rate.
