

# INAPRO<sup>®</sup> PATROL

## The One That Works

### Product Description

INAPRO<sup>®</sup> Patrol is a water conditioner with guar-gum, liquid ammonium sulfate and buffered amine oxides used for pesticides to improve performance and drift control. INAPRO<sup>®</sup> Patrol technology has been proven to fully permeate the plant system and maximize the plant surface.

Unlike the commodity adjuvants, INAPRO<sup>®</sup> Patrol uses buffered amine oxides (BAO) to re-enforce the stability and movement of ammonium sulfate (AMS) within the plant, maintaining their effectiveness and targeting power as they move.

### Benefits and Features

- Three-in-one formulation for water conditioning, drift control and surfactant
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability
- Increased efficacy with patented buffered amine oxide technology and AMS which prevents ionic antagonism with pesticides
- Contains proprietary drift control agents specifically designed for AMS products.

### Application Rate

Ground/Foliar Use

0.625-2.5% v/v -or- 0.5-2.5 gallons per 100 gallons

Aerial Use

2.5-5.0% v/v -or- 2.5-5.0 gallons per 100 gallons
