

KC73-310A

The One That Works

Product Description

KC73-310A is a patent pending buffered amine oxide (BAO) soil adjuvant with wetting and humectant capabilities for turf and crop use. Designed for soil moisture retention in the top layer of the soil profile, reducing chances for localized dry spots.

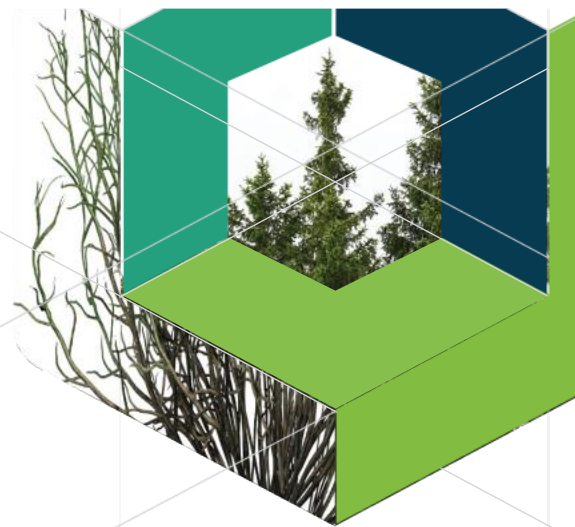

-EXPERIMENTAL-

Benefits and Features

- Buffered amine oxides allow for both soil wetting and soil spread
- Unique structural properties of buffered amine oxides and other chemicals allow for strong moisture retention
- Bio-renewable (not derived from petrochemicals)
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability
- Components “generally recognized as safe” by USFDA and have low inherent toxicology

Application Rate

0.250-2.000% -or- 2 pt. to 2 gallons per 100 gallons
