

Kombo 950 LF®

The All-In-One Adjuvant

Product Description

KOMBO 950 LF® is an all-in-one refined ammonium sulfate based granular adjuvant with organic acidifying agent, guar-gum based drift control, anionic surfactant loading, and tank defoamer. KOMBO 950 LF® is a granular herbicide adjuvant that fully permeates the plant system.

Benefits and Features

- Complete water conditioning agent protects herbicides from the harmful effects of free calcium ions and acidifies the spray solution where alkaline water can reduce the performance of acid-based herbicides such as Glyphosate and 2,4-D.
- Fully water soluble; freeze/thaw stable
- Formulated for robust tank stability, utilizing ammonium sulfate (AMS) and citric acid as compatibility aids
- High-performance wetting agent lowers the surface tension of the spray solution, improving droplet spread
- Defoaming agent prevents buildup of excess foam in the filling process
- Contains proprietary drift control agents specifically designed for AMS products.

Application Rate

2-12 pounds per 100 gallons
